HORN FARM CENTER IS REBUILDING...AND GROWING!

Ignited by a lightning strike and fire in 2021, the Horn Farm Center is building a new educational facility and recreational destination that will serve over 5000 regional visitors each year. The new master plan features regenerative farming demonstrations, hiking trails, teaching gardens, restoration projects and interactive learning depots across 186-acres of publicly accessible land.

The historic farmhouse is the centerpiece of this vision. Together with your support, the Horn Farm Center is rebuilding, growing, and bringing an accessible, energy-efficient, functional, and historically-inspired educational facility into reality.
