# Horn Farm Center

<i>Alliums</i>	Bunching Onions: White Spear	Dependably produces beautiful, upright bunches of green onions! No flopping or curling in its leaves, so easy to clean.
<i>Alliums</i>	Shallots: Matador	French half-long style shallot with classic teardrop shape, reddish-copper skin, and white flesh. Suited for very long storage.
<i>Cucumber &amp; Squash</i>	Cucumber: Cool Customer Pickling	Produces uniform, blocky fruits with small seed cavities and exceptional flavor and crunch. 4-5" fruits over a long harvest period, and tough enough to fight off late season stress and disease much better than earlier varieties.
<i>Cucumber &amp; Squash</i>	Cucumber: Marketmore	Long, slender, and dark green. One of the standards in terms of a slicing cucumber.
<i>Cucumber &amp; Squash</i>	Winter Squash: Cinderella Pumpkin	Antique French heirloom pumpkin. This is the classic 'Cinderella's Coach' pumpkin. Red-orange fruits average 6-18" in diameter. Wonderful for baking, with a deep, rich flavor.
<i>Cucumber &amp; Squash</i>	Winter Squash: Honey Boat	"The sweetest squash in existence." Long fruits have the traditional green striping of delicata squash, but with coppery skin instead of yellow. Stores well.
<i>Cucumber &amp; Squash</i>	Yellow: Zephyr	Distinctive, slender fruits are yellow with faint white stripes and light-green blossom ends. Harvest young at 4-6" for unusually delicious, nutty flavor and firm texture. Vigorous, high-yielding plants. NOTE: Under certain stressful situations, such as hot weather, Zephyr fruits can show some variability in the amount of green at the blossom ends. In addition, sometimes the first one or two fruits produced can be green-striped.  <i>*Edible Flowers:</i> Blossoms bear a mild, squash-like flavor and are great stuffed and fried, or sliced for use in soups, omelets, salads, and pasta dishes.
<i>Cucumber &amp; Squash</i>	Yellow Zucchini: Max's Gold	Small seed cavity, lending to more edible flesh! Ideal for grilling, snacking, or adding to salads. Long, straight, tender fruits will continue to grow throughout the season.
<i>Cucumber &amp; Squash</i>	Yellow Zucchini: Yellowfin Golden	A hybrid yellow zucchini with powdery mildew resistance. Uniform, cylindrical fruits; attractive golden-yellow color.
<i>Cucumber &amp; Squash</i>	Zucchini: Dirani	Compact growing habit, continuous fruit production all summer. Harvest when small for fresh use, or allow to grow for recipes that require stuffing or baking.

<i>Cucumber &amp; Squash</i>	Zucchini: Dunja	An early, powdery mildew resistant hybrid. A high yielder of dark-green, straight zucchinis.
<i>Eggplant</i>	Black Beauty	Fruit makes a good boat for stuffing. For best quality, harvest before its glossy, dark skin begins fading to dull purple. Keep well-watered and harvest early to encourage more production.
<i>Eggplant</i>	Listada de Gandia	7-inch long fruits that are white with lovely, bright purple stripes. Fabulous flavor with sweet, tender flesh.
<i>Eggplant</i>	Long Purple	Long, slender purple fruits not usually found in the grocery store. 8-10" fruits. 24-30" in height, each plant can produce up to 8 or more eggplants!
<i>Flowers</i>	Bachelor Button	We have two varieties: "Tall Blend" and "Black Magic". These care-free, self seeding annuals are drought tolerant and excellent for cut flower bouquets.
<i>Flowers</i>	Borage	Borage provides the gardener with cucumber-flavored leaves for tea or bright starry-blue flowers for decorating a salad. All of the parts of the plant, except roots, are flavorful and have culinary or medicinal use.
<i>Flowers</i>	Coneflower - Pale Purple	Highly adaptable, tolerating drought, heat, humidity, and poor soils. Does best in conditions that are not too wet. Showy, daisy-like flowers bloom in early summer and are a favorite nectar source for pollinators.
<i>Flowers</i>	Gravel Root (Joe-Pye)	Herbaceous perennial native to the central, eastern and southern US. Common names include: Joe Pye Weed, Gravel Root, and Queen of the Meadow. Plant prefers full sun or partial shade and very moist soil. Good drainage is not necessary. This plant will grow around 6-7ft tall.
<i>Flowers</i>	Love-in-a-Mist - Miss Jekyll Blend	A cut flower grower's favorite! Star-like blooms in mellow jewel tones of rose, sky blue, dark blue, and alabaster white.
<i>Flowers</i>	Milkweed - Butterfly Weed (50ct & 3")	Perennial hardy native North American milkweed. Absolutely essential to the survival of Monarch butterflies. Showy orange flowers.
<i>Flowers</i>	Milkweed - Common	Asclepias syriaca. The hardy native Milkweed essential to the survival of Monarch butterflies. Mature butterflies feed on the nectar produced in the flowers, while the foliage provides food for their larvae. The brilliant orange and yellow flowers are showy in massed plantings. Very durable and long-lived once established.

<i>Flowers</i>	Milkweed - Swamp (50ct & 3")	Grows to 36" tall. Upright clump-forming perennial with slender, willow-like leaves and is topped with rounded pinkish flower clusters. Thrives in sunny sites with moist or saturated soils and attracts flocks of butterflies.
<i>Flowers</i>	Scabiosa - Black Knight	Also known as pincushion flower or mourningbride. Elegant and uniform cut flowers. Almost black, 1.5-2.5" blooms stand tall on strong, slender stems.
<i>Flowers</i>	Sunflower - Autumn Beauty	4-6" flowers displaying the rich colors of fall - gold, bronze, orange, and scarlet tones. Well-branching, good bird forage with lots of oil-rich seeds.
<i>Flowers</i>	Sunflower - Chocolate	Tall, branching variety with long stems, good for arranging. Flowers measure 4-6" in diameter. Tops of petals are a rich brown color, while the undersides of petals are yellow-striped. Bears pollen, good for bee forage.
<i>Flowers</i>	Sunflower - Evening Sun	Individual plants will produce flowers in varying colors from gold, to pale yellow, with rings of dusty rose to blush. Branching variety - long 18" stems good for arranging.
<i>Flowers</i>	Sunflower - Short Stuff	Perfect for childrens' gardens! A short, squat variety that stands just 2.5' tall, but produces large flower heads - up to 8" in diameter! Excellent for winter-time bird forage.
<i>Flowers</i>	Sunflower - Teddy Bear	Versatile sunflower for field or container. Like our other dwarfs, the final height depends on the size of the container. Expect 8-12" plants from seeds directly sown in a 4" pot. 35-42" in the garden; 14-25" long stems. Earliest of the teddy types in trial, this branching variety will host 3-5" sunny, shaggy blooms. Popular with children. Minimal pollen. Ht. 8-12" in containers; 35-42" in the garden.
<i>Flowers</i>	Sunflower - Vanilla Ice	Creamy, light yellow petals with a dark brown center. 3'5" blooms on multi-branched, 5' tall plants. Loved by pollinators of all kinds!
<i>Flowers</i>	Sunflower - Velvet Queen	Deep velvety crimson blooms accented by traces of yellow around a black center. 5-6" flower heads that are lovely for cutting.
<i>Flowers</i>	Sweet Alyssums	Alyssums are a great choice if you want a low growing, trouble-free beneficial insect attractor!
<i>Flowers</i>	Tithonia - Red Torch	Known as the Golden Flower of the Aztecs, the brilliant, red-orange, 3-inch flowers are an excellent butterfly plant. Bloom over a long season.

<i>Flowers</i>	Zinnia - Fire & Flame	Fire: 1.5-2.5" fiery double blooms in fiery red. Flame: 2-3.5" biocolor semi-double blooms in magenta and orange. <b>*Supports our <a href="#">education center rebuild!</a>*</b>
<i>Greens</i>	Arugula - Rocket	Tender, rounded leaves add peppery pizzazz to mixed salads. Best harvested young, after about 35 days. Prefers cooler weather.
<i>Greens</i>	Collards: Flash	Rich blue-green cabbage-like leaves. Plants are bolt resistant, productive and hardy. Waxy leaf surface provides natural protection from cabbage worms.
<i>Greens</i>	Kale: Mix (Toscano, White Russ., Red Russ)	A mixture of smooth and curly leafed kale varieties. Harvest lower leaves regularly to extend the season.
<i>Greens</i>	Spinach: Space	Medium dark green leaves are upright and smooth to slightly savoyed. High resistance to downy mildew.
<i>Greens</i>	Swiss Chard: Bright Lights	Lightly savoyed, green or bronze leaves with stems of gold, pink, orange, purple, red, and white with bright and pastel variations.
<i>Greens</i>	Swiss Chard: Fordhook Giant	The gold standard of Swiss chard. Leaves are medium-green and savoyed (crinkled) with white veins and board, white stems. Can be eaten raw or cooked, a good stand-in for spinach as the season warms up.
<i>Herbs</i>	Anise Hyssop	Tender Perennial and somewhat reliable self-seeder. Great pollinator. Long lasting flowers. Easy to save seed. Leaves, flowers, seeds are all edible.
<i>Herbs</i>	Basil: Cardinal	Delicious, fragrant, culinary basil that produces huge purple flower heads that are fantastic in flower arrangements. Spicy/sweet flavor profile, perfect for salads, soups, and curries.
<i>Herbs</i>	Basil: Genovese	One of the best Basils for pesto. Extremely tender and fragrant with a superb taste. 18-24 inches tall.
<i>Herbs</i>	Basil: Lettuce Leaf	Leaves of Jurassic size (up to 6"!) Pleasantly mild in flavor, making it incredibly versatile in the kitchen. Perfect for wraps and spring rolls.
<i>Herbs</i>	Basil: Red Rubin	Dark purple, Italian Large Leaf type. High yields and great flavor. Flat, 3" long leaves stand out horizontally. Purple flowers and purple-copper leaves make an attractive garnish.
<i>Herbs</i>	Basil: Sacred	Also known as Holy basil or Tulsi, this strain is a temperate basil that is more adapted to North America. Many medicinal properties including adaptogenic, expectorant and anti-inflammatory qualities; also can be an immune stimulant.

<i>Herbs</i>	Basil: Thai Sweet	The most frequently used basil in Thai dishes. Often sold as or called "Anise Basil" or "Licorice Basil" because of its sweet, licorice-like flavor that goes particularly well in curries, stir fries and other main dishes.
<i>Herbs</i>	Blue Hyssop	Easy to grow. Showy dark blue flowers spike in summer and fall. Medicinally it is used as a gargle for sore throats. Tasty in smaller amounts in salads, soups and stews.
<i>Herbs</i>	Boneset	Perennial that prefers moist conditions. Produces flat to roundish heads of white flowers. Many different insect species are attracted to the flowers as the nectar is relatively easy to access.
<i>Herbs</i>	Bronze Fennel	Perennial. Excellent culinary and tea herb. Easy to save seed and maintain. Mature Height 5-6 inches. A prized host plant for the Eastern Black Swallowtail butterfly and caterpillar.
<i>Herbs</i>	Chives - Common	Medium to full-sized leaves are excellent for dressing up soups or as a garnish. Flavor is of mild, sweet onion. Edible flowers: Pull the florets apart and sprinkle on salads, dips, sauces, stir-fries, and pizza.
<i>Herbs</i>	Chives - Garlic	Used since ancient times this herb-like perennial forms an attractive border in the garden. Use in salads, stews, and stir fries. Will self-seed.
<i>Herbs</i>	Chocolate Mint	A beautifully dark, peppermint-like cultivar. Incredibly aromatic, easy to harvest and has beautiful flowers that attract many insects. Great for tea.
<i>Herbs</i>	Cilantro - Moroccan	Fast-growing, quickly produces a flush of leaves soon followed by delicate, white (and edible) flowers. Quick to bolt, and ideal for producing an abundance of seeds. Dried seeds can be turned into coriander and used in a variety of international dishes.
<i>Herbs</i>	Cilantro - Santo	Standard cilantro. Slow-bolting selection grown for its leaves. Leaves, seeds, and flowers are all edible.
<i>Herbs</i>	Cutting Celery	Leafy herb with a bold flavor. Used fresh in salads, cooked in soups, stews, and with other mixed veggies. Also known as Leaf Celery.
<i>Herbs</i>	Dill - Bouquet	Early flower plants produce large blooms, seed umbles, and foliage on long stems, making bouquet the perfect choice for culinary adventures or cut-flower use.

<i>Herbs</i>	Elecampane	Herbaceous perennial. Giant plant bearing handsome, yellow flowers. Harvest the octopus-like roots in the fall of the second year's growth. The plant is processed to yield a blue dye. Plant prefers part shade and evermoist soils, although full sun will be tolerated.
<i>Herbs</i>	Evening Primrose	Self-seeding overwintering annual or biennial. Very drought tolerant, bravely producing bloom after yellow, mucilaginous bloom in the evenings, even if sunbaked. The flowers especially make a tasty addition to salads.
<i>Herbs</i>	Fennel - Romanesco	Italian heirloom grows easily and reliably produces plump, green, oval bulbs with feathery tops. Anise-flavored flesh is perfect for spicing up salads, dips, roasting/ grilling dishes and more.
<i>Herbs</i>	Lady's Mantle	Semi-evergreen rhizomatous perennial. Mounding, ground-cover habit which flowers yellow to a height of 1' or more. Beautifully scalloped, deep-green leaves.
<i>Herbs</i>	Lavender - English Munstead	Fragrant grey-green, needle-like foliage and spike of violet-blue flowers. Also known as "true lavender" this Mediterranean native is highly valued for cutting and drying, and for its aromatic fragrance in the essential oils it produces.
<i>Herbs</i>	Lemongrass	A tropical herb packed with a strong citrus flavor. Prized in Asian cooking as well as being used in teas, sauces and soups. Lemongrass forms a tall, grassy clump 3 to 5 feet tall.
<i>Herbs</i>	Lion's Tail (Wild Dagga)	Plant species in the mint family. Broadleaf evergreen shrub that thrives in full sun. Prefers loamy to sandy soils. Bright orange flowers bring beauty and wonder to any outdoor space.
<i>Herbs</i>	Lovage	Young leaves taste like celery with a hint of anise or spice. Used in salads or dishes with potatoes, rice and chicken. Young stems and roots are also edible.
<i>Herbs</i>	Marshmallow	The original source of an Egyptian confection which evolved into today's marshmallows. The roots and velvety leaves have been eaten as a vegetable for centuries, often fried with onion and garlic. 3-4 foot stems of 1-2 inch, white-to-pink flowers are reminiscent of hollyhocks, to which this plant is related. The plant is also renowned in various folk cultures for its reputed medicinal properties.

Herbs	Milk Thistle	Annual or overwintering annual. Giant, shiny-leaved plant with distinct white variegations, producing bright purple flowers. Prefers moist, rich soil and full sun to part shade.
Herbs	Mint - Common	Common mint is neither peppermint, nor spearmint, nor any other specific type. Mints readily cross-pollinate, so plants grown from seed are more viable.
Herbs	Beebalm ( <i>Monarda bradburiana</i> )	Also called Bradbury's Bee Balm, this monarda is shorter and more compact than the popular classic fistulosa variety. Excellent for home landscaping. Tolerates sun, part shade, and average garden soil. Will attract many pollinating insects.
Herbs	Beebalm ( <i>Monarda fistulosa</i> )	Perennial zones 4-9. Also known as Bee Balm and/or Wild Bergamot, this wildflower is native to North America and is a popular pollinator. The aromatic foliage is reminiscent of oregano and the flowers range in shades of earl grey to lavender and pink.
Herbs	Beebalm: Yellow Dotted ( <i>Monarda punctata</i> )	Biennial or short-lived perennial native to the Eastern US. Excellent tea plant. Plant prefers full sun to part shade, forest soils or garden soils.
Herbs	Mountain Mint ( <i>Pycnanthemum virginianum</i> )	Virginia Mountain Mint is a native perennial. Used as a culinary herb and medicinally in tea. Easy to maintain. Prefers occasional watering and part shade to full sun, thriving in a wide range of soils including compact clay.
Herbs	Mountain Mint ( <i>Pycnanthemum pilosum</i> )	Hairy Mountain Mint is present in this area but is not technically a PA native plant. Like most mints this plant forms clumps and spreads via the roots. Grows to around 3ft tall in average soil and 2ft tall in dry and shady soils.
Herbs	Mountain Mint ( <i>Pycnanthemum tenuifolium</i> )	Also known as Slender or Narrow-leaved Mountain Mint. Grows best in full or partial sun and prefers medium soils. Its natural habitat includes upland prairies and dry, rocky, open woods.
Herbs	Mountain Mint ( <i>Pycnanthemum muticum</i> )	Short-toothed mountain mint is native to most of the eastern United States. perhaps too much of a spreader in the loose, rich soil of a typical garden border but perfect for a "wild" area, large naturalistic border, or meadow planting. Bees, butterflies, and other pollinators love it!
Herbs	Mullein - Common ( <i>V. thapsus</i> )	A truly awesome pioneer plant. Prefers full sun to part shade. Will do well in garden beds or poor soil in abandoned fields. A biennial that will flower in the second year and might self-sow.

<i>Herbs</i>	Oregano - Greek	Essential herb for Italian and Greek cooking. Strong oregano aroma and flavor; great for pizza and Italian cooking. Characteristic dark green leaves with white flowers. They are especially good in pasta salads, green salads, and as a fresh pizza topping.
<i>Herbs</i>	Parsley - Flat Leaf	Classic flat leaf variety for use either fresh, dried for seasoning, or for freezing.
<i>Herbs</i>	Parsley - Moss Curled	Beautiful curled-leaf parsley with delicious stems. These plants hold their color in the field without developing white or brown spots. Very cold tolerant and stands up well to summer heat.
<i>Herbs</i>	Peppermint ( <i>Mentha piperita</i> )	A perennial that spreads via its roots. Has many uses including a calming effect. Believed to aid in digestion and sooth the stomach.
<i>Herbs</i>	Sage - Common	Also known as garden sage. Beautiful lavender colored flowers are also edible and attract a wide range of pollinators. Use sage leaves to season soups and other dishes, dressings, sauces, and teas.
<i>Herbs</i>	Sage - Scarlet	Perennial, usually grown as an annual. Branched plant to 2 feet tall, making a lovely mound of gray-green foliage even before the blooming season. Flower spikes are insanely showy, each one four inches or so in length, covered with rich scarlet tubular flowers over a very long season.
<i>Herbs</i>	Saint John's Wort	3 to 4 feet. Flowers yellow. First year it creeps and crawls, and second year it sends up multiple stiff stems that flower yellow in midsummer.
<i>Herbs</i>	Soapwort	Perennial, flowering plant. Used as a natural soap, the roots and leaves can be soaked or heated in water to extract saponins which produce a lather! Can be used as a non-irritating skin cleanser, shampoo, and laundry soap.
<i>Herbs</i>	Spearmint	A perennial that spreads via its roots. Used widely to flavor drinks, salads, confectionaries, and garnish other recipes. Packed with flavor, vitamins and antioxidants.
<i>Herbs</i>	Spilanthes	Grown as an annual, the "Toothache" plant produces beautifully unique flowers that look like a bull's eye. Plant prefers full sun, rich soil and plenty of water. The leaves, and especially the flowers, if eaten, stimulate salivation and produce a numbing/tingling effect in the mouth and on the tongue.

<i>Herbs</i>	Stinging Nettles	Herbaceous perennial. Used as a cooked green or for tea. They must be at least slightly steamed to disarm the sting. Rich in trace minerals like potassium. Prefers moist soil in sun or shade. Transplant 1-2 ft apart. Grows 4 feet.
<i>Herbs</i>	Summer Savory	Often compared to marjoram or thyme, summer savory has a spicy aroma and pungent, peppery flavor. Used for flavoring fresh and dry beans, cabbage, and sauerkraut.
<i>Herbs</i>	Thyme - Creeping	Sturdy aromatic ground cover. Slender, creeping stems and round leaves with lavender blooms. Can withstand light foot traffic and gives off pleasant aroma when walked upon. Drought tolerant once established. Perennial in Zones 5–8.
<i>Herbs</i>	Valerian	Flowers white in second year to a height of 5 feet or more! Prefers full sun to part shade, but can adapt to a wide range of conditions.
<i>Herbs</i>	Wild Lettuce	The most cold-hardy of all lettuces. Overwintering annual or biennial. Known to produce mid-winter, given the right circumstances.
<i>Herbs</i>	Wormwood	Woody perennial subshrub. Silver-green foliage and nodding yellow flowers, thrives on dry edges and in the full sun. Beautiful landscape plant, also a good option for early-spring foliage in mixed bouquets.
<i>Herbs</i>	Sweet Wormwood (Sweet Annie)	Sweetly aromatic and everlasting. Tall plants with fern-like dark green foliage dotted with tiny cream-yellow flowers. Use foliage for wreaths and as a filler for mixed bouquets.
<i>Herbs</i>	Yarrow - White	Amazing white flowers born on feathery-like foliage. Very easy to grow.
<i>Misc.</i>	Alexandria Strawberry (3" Pot)	These Alpine strawberries are great for an easy landscaping plant that also offers gourmet snacking! Though much smaller than the standard Strawberry, these little fruits pack a ton of flavor. Compact plants that produce few runners, making them suitable for rock gardens, path edgings, pots, and window boxes. They begin producing the second spring, sometimes the first fall. Grows best in Zones 5-8. Perennial. <i>*From Johnny's Seeds: "Encourage the plant to put its energy into becoming established by removing all the flower buds for the first 6 weeks after setting out your plants. Also recommend that you remove all the runners during the first year."</i>

Misc.	Alexandria Strawberry (Full Flat)	<p>These Alpine strawberries are great for an easy landscaping plant that also offers gourmet snacking! Though much smaller than the standard Strawberry, these little fruits pack a ton of flavor. Compact plants that produce few runners, making them suitable for rock gardens, path edgings, pots, and window boxes. They begin producing the second spring, sometimes the first fall. Grows best in Zones 5-8. Perennial.</p> <p><i>*From Johnny's Seeds: "Encourage the plant to put its energy into becoming established by removing all the flower buds for the first 6 weeks after setting out your plants. Also recommend that you remove all the runners during the first year."</i></p>
Misc. (Herbaceous Perennial)	Comfrey	<p>Comfrey is a perennial plant that grows to a height of 1-3 ft. It has a dark, turnip-like root and large, hairy broad leaves. Although this plant will bear small bell-shaped, purplish flowers, this variety is sterile and will not spread via seed. It is a slow, clumping variety.</p>
Misc. (Perennial)	Jerusalem Artichokes	<p>The sunchoke, also known as Jerusalem artichoke, sunroot, earth apple, or topinambour, is a species of sunflower native to eastern North America. Prolific, tuberous roots are edible. These will spread very quickly so design accordingly.</p>
Misc.	Leeks - King Richard	<p>Beautiful full-sized leeks. In favorable soil and culture, the white shanks are over a foot long to the first leaf.</p>
Misc	Leeks - Tadorna	<p>Produces medium-length leeks of stark shank/ foliage contrast, from white to dark blue-green. Impressive cold tolerance, moderate leaf disease resistance.</p>
Misc.	Okra: Clemson Spineless	<p>The standard variety in the South. Cream-colored flowers are also edible. Pick when young and still very tender.</p>
Misc	Peanuts - Tennessee Red Valencia	<p>Rich, sweet peanuts with red skins. Yield pods containing 2-4 seeds. Easy to grow without hilling, even in clay soils. Early variety.</p>
Misc. (Perennial)	Rhubarb - Victoria	<p>Victoria is well-adapted to most regions and is widely grown commercially. Grows best in Zones 4-8. Excellent cooking quality in this early, abundant producer. The large, tender, rosy-red stalks gradually turn to pink and then solid-green towards the tip.</p>
Misc (Perennial Tree)	Black Willow	<p>Medium-sized deciduous tree, the largest North American willow species, potentially reaching 35-100' tall. Grows best in areas of full sun and wet or moist soils.</p>

<i>Misc. (Perennial Shrub)</i>	American Elderberry	Outstanding native shrub. Provides wildlife habitat, year-round beauty, and a bountiful crop of edible/ medicinal flowers and berries.
<i>Peppers (Hot)</i>	Black Hungarian	Ornamental and delicious Hungarian heirloom pepper. Unique, black fruit shaped like Jalapenos. Mildly hot with great flavor.
<i>Peppers (Hot)</i>	Capperino	Hot cherry, great for stuffing and pickling. Fruits have moderate heat and average 1.5" in diameter.
<i>Peppers (Hot)</i>	Chinese Five Color	Screaming hot little peppers turn a rainbow of vibrant colors from; purple, cream, yellow, orange to red as they ripen. Great for containers inside.
<i>Peppers (Hot)</i>	Fish	A pre-1947 African American heirloom that was used in fish and shellfish cookery. Fruits are a combination of greens, oranges, browns, whites and red. Spicy and hot with attractive variegated foliage.
<i>Peppers (Hot)</i>	Gochugaru	Classic Korean pepper, named for the flakes traditionally made by drying peppers in the sun. Perfect for making kimchi, and other various Korean sauces. Medium heat.
<i>Peppers (Hot)</i>	Habanero	Super hot! This extremely pungent habanero may be used fresh or dried. Key ingredient in Jamaican "jerk" sauces.
<i>Peppers (Hot)</i>	Jalapeno - Craig's Grande	An improved Jalapeno with big, fat fruits that are perfect for making lots of salsa.
<i>Peppers (Hot)</i>	Jalapeno - Early	Cylindrical fruits are of the smaller, traditional size and have more checking than other hybrids. Small plants best for early season plantings for an early crop.
<i>Peppers (Hot)</i>	Jalapeno - Tam	A very tasty, mild Jalapeno. Same flavor but much less heat.
<i>Peppers (Hot)</i>	Pepperoncini	3-5-inch fruit have a superb flavor and just a little heat. Small plants.
<i>Peppers (Hot)</i>	Serrano Tampequino	Traditional Serrano fruits are borne of big plants and offer a long harvest period. The dark green fruits are eaten green but also make fine chipotles if allowed to ripen to red.
<i>Peppers (Sweet)</i>	Charleston Bell	Classic, sweet bell peppers! Compact growth habit, reaching a height of 4ft. First nematode-resistant bell pepper variety.
<i>Peppers (Sweet)</i>	Corno di Toro	Cornitos are 1-1 1/2" wide at the shoulders and 5" long. They are very early, sweet, and attractive smaller versions of Carmen and Escamillo, with similar maturity. Perfect for grilling and roasting, like their full-size counterparts.

<i>Peppers (Sweet)</i>	Iko Iko	Vigorous open habit with good yield and solid fruit set, even under hot conditions. Plants are upright and sturdy. Strong virus resistance.
<i>Peppers (Sweet)</i>	Islander	Light lavender skin, pale yellow flesh. Medium sized, thick fleshed peppers with mild, slightly sweet taste. Fruits ripen through a showy stage of violet, yellow and orange streaks, eventually turning a rich, dark red. Hybrid.
<i>Peppers (Sweet)</i>	Jimmy Nardello	This fine Italian pepper was brought over in 1887 and has been grown and enjoyed ever since. A prolific plant with fruits that can be cooked in a little olive oil, grilled, chopped, sauteed with other vegetables, or used raw in salsas and salads. These peppers are also perfect for pickling or drying.
<i>Peppers (Sweet)</i>	Jupiter	This variety produces green fruit that are a blocky 4.5 x 4.5 inches. They ripen red and get sweet, thick walls.
<i>Peppers (Sweet)</i>	King of the North (Red)	This variety produces nice, blocky fruit that are nicely flavored when picked green or red.
<i>Peppers (Sweet)</i>	Olympus	Sweet, large, flavorful bell peppers. Widely adapted. Medium-sized plants with good leaf cover. Uniform fruits.
<i>Peppers (Sweet)</i>	Orange Bell	A very sweet hybrid. Ripens from green to a beautiful, deep, tangerine-orange color. Big blocky fruits with thick walls are a great source of antioxidants. One of the sweetest of the colored peppers. Try it in salsa, salads, or cooking.
<i>Peppers (Sweet)</i>	Purple Beauty	Reliable and well-adapted plants produce high yields of a delicious onyx-colored pepper. These compact plants average 18 inches in height, with large, 4-inch black fruit that ripen to deep purple. These gorgeous peppers are flavorful, crisp and juicy with a thick wall, perfect raw or cooked. Note these peppers will lose their color in cooking.
<i>Peppers (Sweet)</i>	Red Marconi	A late bearing Italian pepper that yields big 7" long tapering fruit. Very sweet. Great for frying or eating fresh.
<i>Peppers (Sweet)</i>	Sheepnose Pimento	Gorgeous cheese-type sweet pepper ripening from green to red. Fruits are round, oblate, and stylishly ribbed. Thick walled, crisp, and juicy these fruits keep for a long time when refrigerated. An Ohio heirloom!
<i>Peppers (Sweet)</i>	Shishito	3-3.5" fruits are thin-walled with no heat. Popular in Japan, where it's popularly used for tempura.

<i>Peppers (Sweet)</i>	Sweet Chocolate	The flesh of this pepper is cola colored and delicious. The medium sized, semi-ball shaped fruit ripens early. Great in salads.
<i>Peppers (Sweet)</i>	Sweet Pickle (Christmas Tree)	Purple, pale yellow, orange, and red peppers all on one plant! (Best flavor comes from red fruits) Beautiful as an ornamental, tasty as an edible. Compact 18-24" plants.
<i>Peppers (Sweet)</i>	Violet Sparkle	High yields of easy-to-grow, sweet, violet-color fruit. Pointed, wedge-shaped peppers are purple streaked with pale yellow, and ripen to red. Sweet, crisp, thick-walled and great for snacking.
<i>Tomatillos</i>	Purple	This unusual deep purple tomatillo makes an ideal salsa with a sweet/tart flavor.
<i>Tomatillos</i>	Verde Puebla	The sweet, tangy flavor is essential for Southwestern dishes. Fruits the size of small tomatoes are green when ripe and encased in a papery husk.
<i>Tomatoes (Cherry)</i>	Matt's Wild Cherry	Copious quantities of small, deep red cherries with exceptional flavor. Matt's keeps producing prolifically when every other tomato in the field is down for the count with early blight. Pick frequently as skin is thin and cracks easily. Trellis or let sprawl and naturalize. Indeterminate.
<i>Tomatoes (Cherry)</i>	Pink Bumblebee	Excellent sweet flavor. An alluring combination of light pinks, yellows and oranges. A great mix with other artisan varieties. Indeterminate.
<i>Tomatoes (Cherry)</i>	Pink Tiger	Elongated pink tomato with yellow-orange striping. Great in mixes with the other Artisan varieties. Indeterminate.
<i>Tomatoes (Cherry)</i>	Purple Bumblebee	Excellent sweet flavor. An eye-catching combination of dusky purple and metallic green striping. Great mixed with other artisan varieties. Indeterminate.
<i>Tomatoes (Cherry)</i>	Riesentraube	Originating in Germany, this heirloom cherry tomato was grown by the Pennsylvania Dutch (who were in fact German) as early as the 1850s. The variety's name, fittingly enough, translates from the German as "giant bunch of grapes". The compact indeterminate plants produce huge clusters of 20-40 red fruits, 1 1/2 x 1 1/2", with rich, meaty flavor. Indeterminate.
<i>Tomatoes (Cherry)</i>	Tropical Sunset Cherry	A colorful addition to any garden! Ping-pong ball-sized tomatoes. Bicolored interiors and skins - in shades of green, yellow, pink, and gold. Medium acidity.

<i>Tomatoes (Cherry)</i>	White Cherry	Appealing, pale yellow cherry tomato. Subtle, mild flavor. Plants are compact and easy to pick. Indeterminate.
<i>Tomatoes (Heirloom)</i>	Abe Lincoln	Renowned 1923 heirloom with medium-large, red, meaty fruits. Boasts an incredible old-fashioned flavor. Slicer or canner.
<i>Tomatoes (Heirloom)</i>	Cherokee Purple	Famously rich flavor and texture make this a colorful heirloom favorite. Medium-large, flattened globe, 8-12 oz fruits. Dusky pink with dark-shouldered coloration. Indeterminate.
<i>Tomatoes (Heirloom)</i>	Copia	Unique large gold fruits with a blend of orange/red and green/red striping. Sweet, juicy flesh is swirled with color throughout. Indeterminate.
<i>Tomatoes (Heirloom)</i>	Cosmonaut Volkov	Sweet and tangy fruits are slightly flattened with a healthy red color and moderately green shoulders. Prone to cracking in wet conditions. Originally from Ukraine; produces high yields even in cool conditions. Semi-determinate.
<i>Tomatoes (Heirloom)</i>	Green Zebra	Delicious, tangy salad tomato, ripe just as the green fruits develops a yellow blush, accentuating the darker green stripes. 3-4 oz. fruits are ideal for slicing into wedges for salads. Indeterminate.
<i>Tomatoes (Heirloom)</i>	Indigo Apple	Immature fruits show deep purple, almost black coloration. The 2- to 4-ounce, cherry-type fruit turns red when ripe, and has a good, complex yet sweet tomato flavor. Resists sun-scald and cracking, lasting long into cool autumn weather when others have quit.
<i>Tomatoes (Heirloom)</i>	Japanese Black Trifele	In Russia, these tomatoes are highly prized. A short plant yields prolific quantities of 6 oz fruit that look like a mahogany-colored Pear with green shoulders. Very tasty flesh and a meaty core. Produces all summer long. Indeterminate.
<i>Tomatoes (Heirloom)</i>	Mountain Princess	Perfectly rounded fruits with crowd-pleasing mild sweet flavor. Very productive and early; great for short, cool seasons. Determinate.
<i>Tomatoes (Heirloom)</i>	Paul Robeson	This Russian heirloom is slightly flattened and stands apart for its dusky dark red color. Very flavorful fruits with luscious exotic flavors and good acid/sweet balance. Indeterminate.

<i>Tomatoes (Heirloom)</i>	Brandywine (aka "Pink")	This heirloom standard dates back to 1885. You will love its superb flavor and luscious shade of red-pink. A large beefsteak-shaped fruit that grows on unusually upright plants. Indeterminate.
<i>Tomatoes (Heirloom)</i>	Red Pride	Produces good-flavored, large fruit with a strong red color. Relatively late-season maturity. Vigorous plants with good foliar disease resistance! Determinate.
<i>Tomatoes (Heirloom)</i>	Rose de Bern	A heirloom from Switzerland. Beautiful, nicely-shaped 4- 8 oz fruits are a rose-pink and have an excellent sweet flavor. Indeterminate.
<i>Tomatoes (Heirloom)</i>	Valencia	Round smooth fruit with a brilliant orange color. Excellent, full, and complex flavor with a good balance of acid and sweet. Indeterminate.
<i>Tomatoes (Heirloom)</i>	Yellow Brandywine	Large fruits weighing up to 2 pounds! Excellent flavor and creamy texture. Indeterminate.
<i>Tomatoes (Paste)</i>	Principe Borghese	Small, 1-2 oz grape-shaped fruits with few seeds (perfect for drying, or sauce!)
<i>Tomatoes (Paste)</i>	Speckled Roman	An heirloom with gorgeous, medium sized, oblong orange-red fruits with wavy yellow stripes and excellent flavor. Very crack resistant. Indeterminate.
<i>Tomatoes - Related</i>	Goldie Ground Cherry	This heirloom is not actually a cherry tomato but rather a ground tomatillo! Originating in Poland these fruits are prized for the clean, sweet and fruity flavor. Some say it has hints of pineapple and vanilla.
