## 2026 Plant Sale List

Join us Saturday, May 2nd, 9AM-3PM at the [Horn Farm!](#)

*Additional details and images will be provided for most plants at the Plant Sale. Supplies are limited; listing does not guarantee availability.*

Family	Crop	Variety	Details
Alliums	Leeks	King Richard	Beautiful full-sized leeks. In favorable soil and culture, the white shanks are over a foot long to the first leaf.
	Leeks	Tadorna	Produces medium-length leeks of stark shank/ foliage contrast, from white to dark blue-green. Impressive cold tolerance, moderate leaf disease resistance.
	Onions - Bunching	White Spear	Dependably produces beautiful, upright bunches of green onions! No flopping or curling in its leaves, so easy to clean.
Brassicas	Collards	Champion	Rich blue-green cabbage-like leaves. Plants are bolt resistant, productive and hardy. Waxy leaf surface provides natural protection from cabbage worms.
	Kale	MIXED VARIETIES	A mixture of smooth and curly leafed kale varieties. Harvest lower leaves regularly to extend the season..
Cucurbits	Cucumber	Cool Customer Pickling	Produces uniform, blocky fruits with small seed cavities and exceptional flavor and crunch. 4-5" fruits over a long harvest period, and tough enough to fight off late season stress and disease much better than earlier varieties.
	Cucumber	Marketmore	Long, slender, and dark green. One of the standards in terms of a slicing cucumber.

	Summer Squash	Zephyr	Distinctive, slender fruits are yellow with faint white stripes and light-green blossom ends. Harvest young at 4-6" for unusually delicious, nutty flavor and firm texture. Vigorous, high-yielding plants. NOTE: Under certain stressful situations, such as hot weather, Zephyr fruits can show some variability in the amount of green at the blossom ends. In addition, sometimes the first one or two fruits produced can be green-striped.
	Yellow Zucchini	Yellow Crookneck	
	Yellow Zucchini	Yellowfin Golden	A hybrid yellow zucchini with powdery mildew resistance. Uniform, cylindrical fruits; attractive golden-yellow color.
	Zucchini	Dunja	An early, powdery mildew resistant hybrid. A high yielder of dark-green, straight zucchinis.
Flowers	Ageratum	Timeless Mix	
	Bachelor Button	Black Magic	These care-free, self seeding annuals are drought tolerant and excellent for cut flower bouquets.
	Bachelor Button	Tall Blend	These care-free, self seeding annuals are drought tolerant and excellent for cut flower bouquets.
	Borage		Borage provides the gardener with cucumber-flavored leaves for tea or bright starry-blue flowers for decorating a salad. All of the parts of the plant, except roots, are flavorful and have culinary or medicinal use.
	Coneflower	Purple (E. purpurea) <i>*singles or 50ct. trays</i>	Highly adaptable, tolerating drought, heat, humidity, and poor soils. Does best in conditions that are not too wet. Showy, daisy-like flowers bloom in early summer and are a favorite nectar source for pollinators.
	Coneflower	Pale - Pallida	

	Cup Plant	Silphium perfoliatum	
	Larkspur	Saved Seed	
	Marigold	Durango Red	
	Milkweed	Butterfly Weed (A. tuberosa) <i>*singles or 50ct. trays</i>	Perennial hardy native North American milkweed. Absolutely essential to the survival of Monarch butterflies. Showy orange flowers
	Milkweed	Common (A. syriaca) <i>*singles or 50ct. trays</i>	The hardy native Milkweed essential to the survival of Monarch butterflies. Mature butterflies feed on the nectar produced in the flowers, while the foliage provides food for their larvae. The brilliant orange and yellow flowers are showy in massed plantings. Very durable and long-lived once established.
	Milkweed	Swamp (A. incarnata) <i>*singles or 50ct. trays</i>	Grows to 36" tall. Upright clump-forming perennial with slender, willow-like leaves and is topped with rounded pinkish flower clusters. Thrives in sunny sites with moist or saturated soils and attracts flocks of butterflies.
	Snapdragon	Potomac Ivory	
	Statice	Forever Happy	
	Sunflower	Chocolate	Tall, branching variety with long stems, good for arranging. Flowers measure 4-6" in diameter. Tops of petals are a rich brown color, while the undersides of petals are yellow-striped. Bears pollen, good for bee forage.
	Sunflower	Evening Sun	Individual plants will produce flowers in varying colors from gold, to pale yellow, with rings of dusty rose to blush. Branching variety - long 18" stems good for arranging.
	Sunflower	Mammoth	

	Sunflower	Sonja (cut flower)	
	Sunflower	Teddy Bear Dwarf	Versatile sunflower for field or container. Like our other dwarfs, the final height depends on the size of the container. Expect 8-12" plants from seeds directly sown in a 4" pot. 35-42" in the garden; 14-25" long stems. Earliest of the teddy types in trial, this branching variety will host 3-5" sunny, shaggy blooms. Popular with children. Minimal pollen. Ht. 8-12" in containers; 35-42" in the garden
	Sunflower	Velvet Queen	Deep velvety crimson blooms accented by traces of yellow around a black center. 5-6" flower heads that are lovely for cutting.
	Sweet Alyssums	Sweet Alyssums	Alyssums are a great choice if you want a low growing, trouble-free beneficial insect attractor!
	Tithonia	Red Torch	Known as the Golden Flower of the Aztecs, the brilliant, red-orange, 3-inch flowers are an excellent butterfly plant. Bloom over a long season.
	Zinna	FIRE/FLAME Mix	Fire: 1.5-2.5" fiery double blooms in fiery red. Flame: 2-3.5" biocolor semi-double blooms in magenta and orange.
Greens	Sorrel	Red Veined Sorrel	
	Sorrel	Sorrel	
	Spinach	Tundra	
	Swiss Chard	Fordhook Giant	The gold standard of Swiss chard. Leaves are medium-green and savoyed (crinkled) with white veins and board, white stems. Can be eaten raw or cooked, a good stand-in for spinach as the season warms up.
	Swiss Chard	Mix / Rainbow	

	Anise Hyssop		Tender Perennial and somewhat reliable self-seeder. Great pollinator. Long lasting flowers. Easy to save seed. Leaves, flowers, seeds are all edible.
Herbs	Basil	Cardinal	Delicious, fragrant, culinary basil that produces huge purple flower heads that are fantastic in flower arrangements. Spicy/sweet flavor profile, perfect for salads, soups, and curries.
	Basil	Genovese	One of the best Basils for pesto. Extremely tender and fragrant with a superb taste. 18-24 inches tall.
	Basil	Italian Large Leaf (DMR)	
	Basil	Lettuce leaf	Leaves of Jurassic size (up to 6"! ) Pleasantly mild in flavor, making it incredibly versatile in the kitchen. Perfect for wraps and spring rolls.
	Basil	Sacred	Also known as Holy basil or Tulsi, this strain is a temperate basil that is more adapted to North America. Many medicinal properties including adaptogenic, expectorant and anti-inflammatory qualities; also can be an immune stimulant.
	Basil	Thai Sweet	The most frequently used basil in Thai dishes. Often sold as or called "Anise Basil" or "Licorice Basil" because of its sweet, licorice-like flavor that goes particularly well in curries, stir fries and other main dishes.
	Blue Hyssop		Easy to grow. Showy dark blue flowers spike in summer and fall. Medicinally it is used as a gargle for sore throats. Tasty in smaller amounts in salads, soups and stews.
	Bronze Fennel		Perennial. Excellent culinary and tea herb. Easy to save seed and maintain. Mature Height 5-6 inches. A prized host plant for the Eastern Black Swallowtail butterfly and caterpillar.
	Chamomile	German/Common	
	Chives	Common	Medium to full-sized leaves are excellent for dressing up soups or as a garnish. Flavor is of mild, sweet onion. Edible

			flowers: Pull the florets apart and sprinkle on salads, dips, sauces, stir-fries, and pizza.
	Cilantro	Cruiser	
	Cutting Celery	Cutting Celery	Leafy herb with a bold flavor. Used fresh in salads, cooked in soups, stews, and with other mixed veggies. Also known as Leaf Celery.
	Dill	Thalia	
	Elecampane	Elecampane	Herbaceous perennial. Giant plant bearing handsome, yellow flowers. Harvest the octopus-like roots in the fall of the second year's growth. The plant is processed to yield a blue dye. Plant prefers part shade and evermoist soils, although full sun will be tolerated.
	Feverfew	Feverfew	
	Good King Henry		
	Lemongrass	Lemongrass	A tropical herb packed with a strong citrus flavor. Prized in Asian cooking as well as being used in teas, sauces and soups. Lemongrass forms a tall, grassy clump 3 to 5 feet tall.
	Lion's Tail	Wild Dagga	Plant species in the mint family. Broadleaf evergreen shrub that thrives in full sun. Prefers loamy to sandy soils. Bright orange flowers bring beauty and wonder to any outdoor space.
	Marjoram		
	Marshmallow		The original source of an Egyptian confection which evolved into today's marshmallows. The roots and velvety leaves have been eaten as a vegetable for centuries, often fried with onion and garlic. 3-4 foot stems of 1-2 inch, white-to-pink flowers are reminiscent of hollyhocks, to which this plant is related.

			The plant is also renowned in various folk cultures for its reputed medicinal properties.
	Milk Thistle		Annual or overwintering annual. Giant, shiny-leaved plant with distinct white variegations, producing bright purple flowers. Prefers moist, rich soil and full sun to part shade.
	Mint	Common	Common mint is neither peppermint, nor spearmint, nor any other specific type. Mints readily cross-pollinate, so plants grown from seed are more viable.
	Monarda	Eastern beebalm (M. bradburiana) <i>*singles or 50ct. trays</i>	Also called Bradbury's Bee Balm, this monarda is shorter and more compact than the popular classic fistulosa variety. Excellent for home landscaping. Tolerates sun, part shade, and average garden soil. Will attract many pollinating insects.
	Monarda	Wild bergamot (M. fistulosa) <i>*singles or 50ct. trays</i>	Perennial zones 4-9. Also known as Bee Balm and/or Wild Bergamot, this wildflower is native to North America and is a popular pollinator. The aromatic foliage is reminiscent of oregano and the flowers range in shades of earl grey to lavender and pink.
	Monarda	Yellow spotted beebalm (M. punctata) <i>*singles or 50ct. trays</i>	Biennial or short-lived perennial native to the Eastern US. Excellent tea plant. Plant prefers full sun to part shade, forest soils or garden soils.
	Mountain Mint	Clustered (P. muticum) <i>*singles or 50ct. trays</i>	Short-toothed mountain mint is native to most of the eastern United States. perhaps too much of a spreader in the loose, rich soil of a typical garden border but perfect for a "wild" area, large naturalistic border, or meadow planting. Bees, butterflies, and other pollinators love it!
	Mountain Mint	Hairy (P. pilosum) <i>*singles or 50ct. trays</i>	Hairy Mountain Mint is present in this area but is not technically a PA native plant. Like most mints this plant forms clumps and spreads via the roots. Grows to around 3ft tall in average soil and 2ft tall in dry and shady soils.

	Mountain Mint	Slender ( <i>P. tenuifolium</i> ) <i>*singles or 50ct. trays</i>	Also known as Slender or Narrow-leaved Mountain Mint. Grows best in full or partial sun and prefers medium soils. Its natural habitat includes upland prairies and dry, rocky, open woods.
	Mountain Mint	Virginia ( <i>P. virginianum</i> )	Virginia Mountain Mint is a native perennial. Used as a culinary herb and medicinally in tea. Easy to maintain. Prefers occasional watering and part shade to full sun, thriving in a wide range of soils including compact clay.
	Mullein	Common ( <i>V. thapsus</i> )	A truly awesome pioneer plant. Prefers full sun to part shade. Will do well in garden beds or poor soil in abandoned fields. A biennial that will flower in the second year and might self-sow.
	Oregano	Greek (+root division if needed)	Essential herb for Italian and Greek cooking. Strong oregano aroma and flavor; great for pizza and Italian cooking. Characteristic dark green leaves with white flowers. They are especially good in pasta salads, green salads, and as a fresh pizza topping.
	Parsley - Curly	Darki Green	Beautiful curled-leaf parsley with delicious stems. These plants hold their color in the field without developing white or brown spots. Very cold tolerant and stands up well to summer heat.
	Parsley - Flat	Giant of Italy	Classic flat leaf variety for use either fresh, dried for seasoning, or for freezing.
	Pennyroyal		
	Peppermint	<i>Mentha piperita</i>	A perennial that spreads via its roots. Has many uses including a calming effect. Believed to aid in digestion and sooth the stomach.
	Rosemary		
	Sage	Common	Also known as garden sage. Beautiful lavender colored

			flowers are also edible and attract a wide range of pollinators. Use sage leaves to season soups and other dishes, dressings, sauces, and teas
	Sage	Scarlet	Perennial, usually grown as an annual. Branched plant to 2 feet tall, making a lovely mound of gray-green foliage even before the blooming season. Flower spikes are insanely showy, each one four inches or so in length, covered with rich scarlet tubular flowers over a very long season.
	Saint John's Wort		3 to 4 feet. Flowers yellow. First year it creeps and crawls, and second year it sends up multiple stiff stems that flower yellow in midsummer.
	Skullcap		
	Soapwort		Perennial, flowering plant. Used as a natural soap, the roots and leaves can be soaked or heated in water to extract saponins which produce a lather! Can be used as a non-irritating skin cleanser, shampoo, and laundry soap.
	Spearmint		A perennial that spreads via its roots. Used widely to flavor drinks, salads, confectionaries, and garnish other recipes. Packed with flavor, vitamins and antioxidants.
	Spilanthes		Grown as an annual, the "Toothache" plant produces beautifully unique flowers that look like a bull's eye. Plant prefers full sun, rich soil and plenty of water. The leaves, and especially the flowers, if eaten, stimulate salivation and produce a numbing/tingling effect in the mouth and on the tongue.
	Stinging Nettles	root cutting	Herbaceous perennial. Used as a cooked green or for tea. They must be at least slightly steamed to disarm the sting. Rich in trace minerals like potassium. Prefers moist soil in sun or shade. Transplant 1-2 ft apart. Grows 4 feet.

	Thyme	Creeping <i>*singles or 50ct trays</i>	Sturdy aromatic ground cover. Slender, creeping stems and round leaves with lavender blooms. Can withstand light foot traffic and gives off pleasant aroma when walked upon. Drought tolerant once established. Perennial in Zones 5–8.
	Thyme	English (Summer)	
	Tobacco	Midewiwan	
	Wild Lettuce		The most cold-hardy of all lettuces. Overwintering annual or biennial. Known to produce mid-winter, given the right circumstances.
	Wormwood		Woody perennial subshrub. Silver-green foliage and nodding yellow flowers, thrives on dry edges and in the full sun. Beautiful landscape plant, also a good option for early-spring foliage in mixed bouquets.
	Wormwood (Sweet)	Sweet Annie	Sweetly aromatic and everlasting. Tall plants with fern-like dark green foliage dotted with tiny cream-yellow flowers. Use foliage for wreaths and as a filler for mixed bouquets.
	Yarrow	Colorado	
	Yarrow	White	Amazing white flowers born on feathery-like foliage. Very easy to grow.
	Yellow Giant Hyssop		
	Za'Atar Lebanese		
MISC.	Comfrey	Russian	Comfrey is a perennial plant that grows to a height of 1-3 ft. It has a dark, turnip-like root and large, hairy broad leaves. Although this plant will bear small bell-shaped, purplish flowers, this variety is sterile and will not spread via seed. It is a slow, clumping variety.
	Fennel	Romanesco	Italian heirloom grows easily and reliably produces plump,

			green, oval bulbs with feathery tops. Anise-flavored flesh is perfect for spicing up salads, dips, roasting/ grilling dishes and more.
	Horseradish		
	Okra	Clemson Spineless	The standard variety in the South. Cream-colored flowers are also edible. Pick when young and still very tender.
	Rhubarb	Victoria	Victoria is well-adapted to most regions and is widely grown commercially. Grows best in Zones 4-8. Excellent cooking quality in this early, abundant producer. The large, tender, rosy-red stalks gradually turn to pink and then solid-green towards the tip.
	Strawberry	Alexandria Strawberry <i>*singles or 50ct. trays</i>	These Alpine strawberries are great for an easy landscaping plant that also offers gourmet snacking! Though much smaller than the standard Strawberry, these little fruits pack a ton of flavor. Compact plants that produce few runners, making them suitable for rock gardens, path edgings, pots, and window boxes. They begin producing the second spring, sometimes the first fall. Grows best in Zones 5-8. Perennial.
	Sunchoke / Jerusalem Artichoke	White Stampede	The sunchoke, also known as Jerusalem artichoke, sunroot, earth apple, or topinambour, is a species of sunflower native to eastern North America. Prolific, tuberous roots are edible. These will spread very quickly so design accordingly.
Nightshades	Eggplant	Black Beauty	Fruit makes a good boat for stuffing. For best quality, harvest before its glossy, dark skin begins fading to dull purple. Keep well-watered and harvest early to encourage more production.
	Eggplant	Long Purple	Long, slender purple fruits not usually found in the grocery store. 8-10" fruits. 24-30" in height, each plant can produce up to 8 or more eggplants!

	Eggplant	Rosa Bianca	
	Eggplant	Thanos	
	Peppers - Hot	Arriba (Yellow Jalapeno)	
	Peppers - Hot	Black Hungarian	Ornamental and delicious Hungarian heirloom pepper. Unique, black fruit shaped like Jalapenos. Mildly hot with great flavor.
	Peppers - Hot	Capperino	Hot cherry, great for stuffing and pickling. Fruits have moderate heat and average 1.5" in diameter.
	Peppers - Hot	Chinese Five Color	Screaming hot little peppers turn a rainbow of vibrant colors from; purple, cream, yellow, orange to red as they ripen. Great for containers inside.
	Peppers - Hot	Fish	An African American heirloom that was used in fish and shellfish cookery. Fruits are a combination of greens, oranges, browns, whites and red. Spicy and hot with attractive variegated foliage.
	Peppers - Hot	Habenero	Super hot! This extremely pungent habanero may be used fresh or dried. Key ingredient in Jamaican "jerk" sauces.
	Peppers - Hot	Hungarian Hot Wax	
	Peppers - Hot	Jalapeno - Craig's Grande	An improved Jalapeno with big, fat fruits that are perfect for making lots of salsa.
	Peppers - Hot	Jalapeno - Tam	A very tasty, mild Jalapeno. Same flavor but much less heat.
	Peppers - Hot	Serrano Tampequino	Traditional Serrano fruits are borne of big plants and offer a long harvest period. The dark green fruits are eaten green but also make fine chipotles if allowed to ripen to red.
	Peppers - Sweet	Corno di Toro	Cornitos are 1-1 1/2" wide at the shoulders and 5" long. They are very early, sweet, and attractive smaller versions of Carmen and Escamillo, with similar maturity. Perfect for

		grilling and roasting, like their full-size counterparts.
Peppers - Sweet	Flavorburst	
Peppers - Sweet	Iko Iko	Vigorous open habit with good yield and solid fruit set, even under hot conditions. Plants are upright and sturdy. Strong virus resistance.
Peppers - Sweet	Islander	Light lavender skin, pale yellow flesh. Medium sized, thick fleshed peppers with mild, slightly sweet taste. Fruits ripen through a showy stage of violet, yellow and orange streaks, eventually turning a rich, dark red. Hybrid.
Peppers - Sweet	Jimmy Nardello	This fine Italian pepper was brought over in 1887 and has been grown and enjoyed ever since. A prolific plant with fruits that can be cooked in a little olive oil, grilled, chopped, sauteed with other vegetables, or used raw in salsas and salads. These peppers are also perfect for pickling or drying.
Peppers - Sweet	Jupiter	This variety produces green fruit that are a blocky 4.5 x 4.5 inches. They ripen red and get sweet, thick walls.
Peppers - Sweet	King of the North (Red)	This variety produces nice, blocky fruit that are nicely flavored when picked green or red.
Peppers - Sweet	OLYMPUS	Sweet, large, flavorful bell peppers. Widely adapted. Medium-sized plants with good leaf cover. Uniform fruits.
Peppers - Sweet	Orange Bell	A very sweet hybrid. Ripens from green to a beautiful, deep, tangerine-orange color. Big blocky fruits with thick walls are a great source of antioxidants. One of the sweetest of the colored peppers. Try it in salsa, salads, or cooking.
Peppers - Sweet	Purple Beauty	Reliable and well-adapted plants produce high yields of a delicious onyx-colored pepper. These compact plants average 18 inches in height, with large, 4-inch black fruit that ripen to deep purple. These gorgeous peppers are flavorful, crisp and juicy with a thick wall, perfect raw or cooked. Note these

		peppers will lose their color in cooking.
Peppers - Sweet	Red Marconi	A late bearing Italian pepper that yields big 7" long tapering fruit. Very sweet. Great for frying or eating fresh.
Peppers - Sweet	Sweet Chocolate	The flesh of this pepper is cola colored and delicious. The medium sized, semi-ball shaped fruit ripens early. Great in salads
Peppers - Sweet	Sweet Pickle (Christmas Tree)	Purple, pale yellow, orange, and red peppers all on one plant! (Best flavor comes from red fruits) Beautiful as an ornamental, tasty as an edible. Compact 18-24" plants.
Tomatillos	Purple	This unusual deep purple tomatillo makes an ideal salsa with a sweet/tart flavor.
Tomatillos	Verde Puebla	The sweet, tangy flavor is essential for Southwestern dishes. Fruits the size of small tomatoes are green when ripe and encased in a papery husk.
Tomatoes	Brandywine (aka "Pink")	This heirloom standard dates back to 1885. You will love its superb flavor and luscious shade of red-pink. A large beefsteak-shaped fruit that grows on unusually upright plants. Indeterminate.
Tomatoes	Cherokee Purple	Famously rich flavor and texture make this a colorful heirloom favorite. Medium-large, flattened globe, 8-12 oz fruits. Dusky pink with dark-shouldered coloration. Indeterminate.
Tomatoes	Copia	Unique large gold fruits with a blend of orange/red and green/red striping. Sweet, juicy flesh is swirled with color throughout. Indeterminate.
Tomatoes	Cosmonaut Volkov	Sweet and tangy fruits are slightly flattened with a healthy red color and moderately green shoulders. Prone to cracking in wet conditions. Originally from Ukraine; produces high yields even in cool conditions. Semi-determinate.
Tomatoes	Green Zebra	Delicious, tangy salad tomato, ripe just as the green fruits develops a yellow blush, accentuating the darker green

		stripes. 3-4 oz. fruits are ideal for slicing into wedges for salads. Indeterminate.
Tomatoes	Indigo Apple	Immature fruits show deep purple, almost black coloration. The 2- to 4-ounce, cherry-type fruit turns red when ripe, and has a good, complex yet sweet tomato flavor. Resists sun-scald and cracking, lasting long into cool autumn weather when others have quit.
Tomatoes	Moskovitch	
Tomatoes	Mountain Princess	Perfectly rounded fruits with crowd-pleasing mild sweet flavor. Very productive and early; great for short, cool seasons. Determinate.
Tomatoes	Paul Robeson	This Russian heirloom is slightly flattened and stands apart for its dusky dark red color. Very flavorful fruits with luscious exotic flavors and good acid/sweet balance. Indeterminate.
Tomatoes	Red Pride	Produces good-flavored, large fruit with a strong red color. Relatively late-season maturity. Vigorous plants with good foliar disease resistance! Determinate.
Tomatoes	Rose de Bern	A heirloom from Switzerland. Beautiful, nicely-shaped 4- 8 oz fruits are a rose-pink and have an excellent sweet flavor. Indeterminate.
Tomatoes	Valencia	Round smooth fruit with a brilliant orange color. Excellent, full, and complex flavor with a good balance of acid and sweet. Indeterminate.
Tomatoes	Yellow Brandywine	Large fruits weighing up to 2 pounds! Excellent flavor and creamy texture. Indeterminate.
Tomatoes - Cherry	Black Cherry	
Tomatoes - Cherry	Matt's Wild Cherry	Copious quantities of small, deep red cherries with exceptional flavor. Matt's keeps producing prolifically when every other tomato in the field is down for the count with

			early blight. Pick frequently as skin is thin and cracks easily. Trellis or let sprawl and naturalize. Indeterminate.
	Tomatoes - Cherry	White Cherry	Appealing, pale yellow cherry tomato. Subtle, mild flavor. Plants are compact and easy to pick. Indeterminate.
	Tomatoes - Paste	Principe Borghese	Small, 1-2 oz grape-shaped fruits with few seeds (perfect for drying, or sauce!)
	Tomatoes - Paste	Roma	
	Tomatoes - Paste	Speckled Roman	An heirloom with gorgeous, medium sized, oblong orange-red fruits with wavy yellow stripes and excellent flavor. Very crack resistant. Indeterminate
	Tomatoes - Related	Goldie Ground Cherry	This heirloom is not actually a cherry tomato but rather a ground tomatillo! Originating in Poland these fruits are prized for the clean, sweet and fruity flavor. Some say it has hints of pineapple and vanilla.
Shrubs Trees	Black Willow	Black Willow	Medium-sized deciduous tree, the largest North American willow species, potentially reaching 35-100' tall. Grows best in areas of full sun and wet or moist soils.
	Buttonbush	Buttonbush	
	Elderberry	Elderberry	Outstanding native shrub. Provides wildlife habitat, year-round beauty, and a bountiful crop of edible/ medicinal flowers and berries.
	Sycamore	Sycamore
